Professional Cylinder Inspectors
1183 University Dr., Ste. 105-226,
Burlington, NC. 27215

Attn: Mark Gresham

Mark,

It is with great pleasure that Catalina Cylinders Inc. recognize and endorse Professional Cylinder Inspectors for their ongoing commitment to educating, training and keeping the cylinder industry up to date on the latest regulations. Professional Cylinder Inspectors takes the guess work out of understanding the regulations from the Department of Transportation, the Compressed Gas Association, Transport Canada, OSHA and so on. Their inspection protocol not only complies with all governmental regulations but it is also in line with Catalina Cylinders manufacturing and inspection guidelines.

Training is such an important part of the cylinder industry. It is experts like Mark and his team of highly trained instructors that continue to certify inspectors making sure cylinders with questionable integrity are not returned to service. In fact PSI/PCI has trained many of the quality inspectors at Catalina Cylinders.

Sincerely,

A handwritten signature in blue ink, appearing to read "Richard Hill", is written over a light blue horizontal line.

Richard Hill
Vice President & General Manager
